

Subject Index to Volume 28

A

- Acclimation: *see* Temperature
- Acetylcholine
 ganglionic, modulation of release by muscarinic and nicotinic receptors, R288
 microinjection, intermedialateral nucleus, R357
- ACh: *see* Acetylcholine
- Acid-base balance, cardiac tissue, exposure to anoxia and acidosis (turtle), R15
- Acidosis
 cardiac tissue exposed to, force and acid-base state of (turtle), R15
 hypercapnic, vasopressin role in, awake state, R690
 intracellular pH and inorganic phosphates during, heart, ³¹P-NMR measurements of (turtle), R521
 metabolic, adaptation to, kidney, R277
- ACTH: *see* Adrenocorticotrophic hormone
- Adenosine triphosphatase, myosin, temperature acclimation and (fish), R237
- ADH: *see* Antidiuretic hormone
- Adipocytes
 candidate gene regulation, body weight (monkey), R1148
 morphology, spontaneous obesity in aging males, model, R1117
- Adipose tissue
 brown: *see* Brown fat
 growth, spontaneous obesity in aging males, model, R1117
 white, glucose uptake, cold effects, R1043
- Adipsin, reduced, adrenal steroids and, obesity, R184
- Adrenalectomy
 brown fat, atrophic state of, R61
 delayed-type hypersensitivity, fever effects on expression of, R1
 reduced adipsin mRNA and, obesity, R184
- Adrenal medulla
 enlarged, diminished epinephrine response to hypoglycemia and, R998
 thermal nociception, ACTH and norepinephrine release by blood loss, R1236
- Adrenal steroids, reduced adipsin mRNA and, obesity, R184
- Adrenocorticotrophic hormone
 plasma levels, feeding effects, preweaning life (baboon), R157
 release, thermal nociception and, blood loss, R1236
 vasopressin and drinking, baroreceptor effects, R618
- Aerobic capacity
 quantitative genetics (snake), R986
 temperature acclimation, metabolic response to, muscle (fish), R245
- Aging
 preweaning life, feeding effects on preweaning (baboon), R157
 spontaneous obesity, male, model, R1117
- Air, temperature, regulation (coypos), R1220
- Alanine, brain, changes during anoxia (turtle), R376
- Aldose reductase, inhibition, permeability at blood-retinal barrier in diabetes, R601
- Aldosterone
 ANF and, blood pressure control, R973
 angiotensin II-induced hypertension and, R102
 plasma, salt taste, circadian rhythm in, R931
 salt intake, calcium deprivation and, R411
- Allometry, body composition and energy expenditure, basal metabolic rates and (bird), R333
- Amiloride, early sodium chloride deprivation, taste response recovery and, R786
- Amino acids
 brain, changes during anoxia (turtle), R376
 dietary limiting
 prepyriform cortex, food intake and, R709
 prepyriform cortex, meal patterns and, R716
 imbalance, anorectic response to, serotonin receptor antagonist effects, R627
 transport, brush-border membrane vesicles, intestine (eel), R1181
- γ -Aminobutyric acid, brain, changes during anoxia (turtle), R376
- p-Aminohippurate, sodium-coupled transport, urinary bladder (crustacean), R147
- Ammoniogenesis, adaptation to acidosis, renal, R277
- Anesthesia, sensitivity (pig), R133
- Anestrus, cold-induced, diet and body fat effects (hamster), R1198
- ANF: *see* Atrial natriuretic factor
- Angiogenesis, growth regulation, vascular system, R393
- Angiotensin
 long-term arterial pressure control, computer and graphic models, R865
 salt appetite and, R729
 salt intake, calcium deprivation and, R411
 vagal stimulation, diminished cardiovascular responsiveness to, R842
- Angiotensin I, renin activity, progesterone-cortisol interaction in, R350
- Angiotensin II
 circulating, drinking behavior and, R531
 hypertension
 chronic lymph flow and transcapillary fluid flux during, R1205
 salt sensitivity in, R1012
 vasopressin and drinking, baroreceptor effects, R618
- Angiotensin-converting enzyme inhibitor, salt appetite, thirst and, R736
- Anions, organic, transport, sodium-coupled, urinary bladder (crustacean), R147
- Anoxia
 cardiac tissue exposed to, force and acid-base state of (turtle), R15
 intracellular pH and inorganic phosphates during, heart, ³¹P-NMR measurements of (turtle), R521
 neurotransmitter changes, brain (turtle), R376
- ANP: *see* Atrial natriuretic peptide
- Antidiuresis, subnormal levels of AVP and, R53
- Antidiuretic hormone: *see also* Vasopressin
 response to adrenergic stimulation, anterior third ventricle (duck), R294
 subnormal levels of AVP and, R53
- Antiglucocorticoids, development of obesity and, R539
- Apnea, sleep, cardiac arrhythmias and, R282
- Area postrema
 interstitial solute dispersion, microvascular specializations, R1131
 sinoaortic denervation, cerebral, baroreceptors and metabolism, R305
- Arrhythmia, cardiac, sleep apnea and, R282
- Arteriovenous fistula, enalapril and response to ANF, heart failure, R84
- Atrial natriuretic factor
 blood pressure control and, sodium and aldosterone in, R973
 microinjection of, ventrolateral medulla, cardiovascular effects, R32
 modulation, tubuloglomerular feedback, kidney, R97
 renal response to, heart failure, R84
 volume expansion, renal sympathetic nerves and, fetus (sheep), R1050
- Atrial natriuretic peptide
 circulatory and renal actions of, sympathectomy effects, R1275
 fluid excretion and, after cardiac denervation, R70
 infusion, vasoconstriction after autonomic blockade, awake state, R813
 intrarenal infusion, arterial pressure and, R585
 plasma, levels, atrial appendages in modulation of, awake state, R1017
- Atriopeptin II, circulatory and renal actions of, sympathectomy effects, R1275
- Atropine
 ganglionic, modulation of release by muscarinic and nicotinic receptors, R288
 pressor response, stimulation of nucleus ambiguus, R955
- Autonomic nervous system, thermal nociception, ACTH and norepinephrine release by blood loss, R1236
- Autonomic responses, ω -conotoxin, awake state, R427
- AVP: *see* Vasopressin, arginine
- Awake state
 ANP plasma levels, atrial appendages and, R1017
 autonomic blockade, ANP infusion and vasoconstriction after, R813

Awake state (*continued*)

- central effects of substance P and somatostatin, streptozotocin treatment and, R405
- ω -conotoxin, autonomic and behavioral responses to, R427
- graded hemorrhage, renal response to (pig), R119
- hypoxemia and hypercapnic acidosis, vasopressin role in, R690
- hypoxia and hypercapnia, body temperature effects, R492
- synchronized activity, cardiac sympathetic nerve, R499
- urinary sodium loss, servo-controlled replacement of, R313

B

- Barodenervation, normalization of arterial pressure after, R1172
- Behavior
 - adjustments, sham feeding, R1228
 - energetics, schedule-induced activities, R485
 - performance, temperature change effects, R191
 - semiaquatic, temperature regulation and (coypus), R1220
- Benzodiazepines, injection, circadian period changes and (hamster), R514
- Bicarbonate, ^{14}C -labeled, washout kinetics, metabolic rate effects, R163
- Blockade
 - β -adrenergic, cardiac responses (seal, pig), R849
 - ganglion, ANP-induced vasoconstriction, awake state, R813
- Blood, chemistry, fasting duration effects, neonate (seal), R1086
- Blood-brain barrier, interstitial solute dispersion, microvascular specializations, R1131
- Blood flow: *see also* Circulation; Microcirculation
 - autoregulation, long-term arterial pressure control, model, R865
 - forearm, dietary fatty acids and, R1164
 - limb, heat-induced vasodilation, dehydration (baboon), R1139
 - renal responses to, awake state (pig), R119
 - uterine
 - cardiovascular, renal, and lung function in fetus, R1004
 - hypoxemia and (sheep), R703
 - volume and, baroreflex response to, R792
- Blood pressure: *see also* Pressure
 - ANP infusion, intrarenal, R585
 - baroreflex control, forearm, dietary fatty acids and, R1164
 - control, ANF and, R973
 - fetus, uterine blood flow effects, R1004
 - forearm ischemia, dynamic hand exercise and, R1156
 - microdialysis, histamine regulation, R507
 - obesity-induced hypertension, model, R981
 - renal responses to, awake state (pig), R119
 - streptozotocin treatment, awake state, substance P and somatostatin effects, R405
 - vasoactive drugs, serotonergic neuron response to, R963

- volume expansion, renal nerves and, fetus (sheep), R1050
- Blood-retinal barrier, permeability changes, diabetes, aldose reductase inhibition and, R601
- Blood volume: *see also* Volume
 - changes, baroreflex response to, R792
 - fetus, uterine blood flow effects, R1004
 - limb, heat-induced vasodilation, dehydration (baboon), R1139
 - long-term arterial pressure control, computer and graphic models, R865
- Body, composition, basal metabolic rates and (bird), R333
- Bone, resorption, continual monitoring of, R679
- Brain
 - autonomic and behavioral responses, ω -conotoxin, awake state, R427
 - fever, vasopressin and oxytocin responses, R1056
 - metabolic and hormonal activations, during hemorrhage, R305
 - natriuretic peptide, injection into ventrolateral medulla, cardiovascular effects, R32
 - neurotransmitters, changes during anoxia (turtle), R376
 - pressor response to peripheral hyperosmolality, histamine regulation of, R507
- Brain stem
 - neurogenesis, respiratory rhythm and pattern, R879
 - neurons, sympathetic nerve relations, R561
- Breathing: *see* Respiration
- Brown fat
 - atrophic state, underlying mechanisms of, R61
 - atrophy in, capsaicin desensitization and, R324
 - energetics of pregnancy, calorimetric study (hamster), R807
 - glucose uptake, cold effects, R1043
 - norepinephrine turnover, temperature effects, R90
 - RU 486 effects, development of obesity, R539
 - thermogenesis, paraventricular nucleus lesions and, exercise, R579
- Brush-border membrane vesicles, intestine, lysine transport (eel), R1181

C

- Cachectin, interleukin 1β and TNF, fever, R724
- Calcium
 - cycling, muscle, temperature change effects, R197
 - deprivation, salt intake and, R411
 - temperature and pH effects, muscle, R204
 - transport, myocardial sarcolemma (trout), R453
 - uptake, vascular smooth muscle, compartmental analysis, R172
- Calcium channels
 - protein kinase C and, release of norepinephrine and neuropeptide Y (guinea pig), R925
 - voltage-sensitive, ω -conotoxin, awake state, R427
- Calorimetry, pregnancy energetics (hamster), R807

- Candidate genes, regulation, body weight (monkey), R1148
- Capsaicin, desensitization, atrophy in brown fat and, R324
- Captopril, hypotension, thirst relations, R362
- Carbon dioxide
 - body temperature effects, awake state, R492
 - respiratory rhythms, chemoreceptor modulation of, R887
 - transport, metabolic rate and bicarbonate kinetics, R163
- Cardiac output
 - after hemorrhage and resuscitation, preheparinization effects, R645
 - ANP-induced vasoconstriction, awake state, R813
 - distribution, atrophic state of brown fat, R61
 - response to graded hemorrhage, awake state (pig), R119
- Cardiovascular function, fetus, uterine blood flow effects, R1004
- Cardiovascular regulation, ANF injection, ventrolateral medulla, R32
- Catecholamines
 - depression, endolymphatic sac direct current potential (guinea pig), R921
 - endocrine and fluid responses, fetal fluid loss (sheep), R745
 - fetal, response to maternal hypoglycemia, R1126
 - prolonged hypoxemia and (sheep), R703
 - response, hypoglycemia, enlarged adrenal medulla and, R998
 - vasopressin and drinking, baroreceptor effects, R618
- Central nervous system
 - substance P and somatostatin effects, streptozotocin-treated, awake state, R405
 - temperature change effects, R191
- Cerebral ventricles
 - asynchronously contracting, simulation of mechanoenergetics of, R1075
 - anterior third, norepinephrine and norepinephrine agonists (duck), R294
 - CRH injection, sympathetic activity and, R799
 - fourth, neuropeptide effects on behavior, R317
- Cerebrospinal fluid, composition, arginine vasopressin effects, hyperosmolar state, R1250
- Chloride, transport, PCMBs inhibition of, plasma membrane, gut (seahare), R1111
- Chloride cells, cortisol stimulation of, opercular membrane (tilapia), R857
- p*-Chloromercurobenzene sulfate, inhibition, active chloride transport, plasma membrane vesicles, gut (seahare), R1111
- Chorda tympani
 - nerve responses, synergism between monosodium glutamate and $5'$ -nucleotides, R420
 - taste response recovery, early sodium chloride depletion, R786
- Circadian rhythm: *see* Rhythms
- Circulation: *see also* Blood flow; Microcirculation
 - liver, outflow pressure effects (sheep), R780
 - response to adrenergic stimulation, anterior third ventricle (duck), R294

- Cold**
 anestrus induced by, diet and body fat effects (hamster), R1198
 exposure, glucose uptake and, peripheral tissues, R1043
 norepinephrine turnover and, brown fat, R90
- Compartmental analysis, calcium uptake, vascular smooth muscle, R172**
- ω -Conotoxin, autonomic and behavioral responses, awake state, R427**
- Converting enzyme, inhibition, renal response to ANF and, experimental heart failure, R84**
- Corn oil, preference, sham feeding, obesity and, R1093**
- Corticosterone**
 hypothalamic control
 exercise metabolism, R478
 sympathoadrenal activity, R470
 response, feeding, peripubertal feeding, R25
 stress and, brain lactate, R773
- Corticotropin-releasing hormone, preoptic area injection of, sympathetic activity and, R799**
- Cortisol**
 plasma levels
 feeding effects, preweaning life (baboon), R157
 salt taste, circadian rhythm in, R931
 progesterone interaction, control of renin activity, R350
 stimulation, chloride cells, opercular membrane (tilapia), R857
- Creatine kinase, neutrophils and, acute phase response in exercise, R1214**
- CRH: see Corticotropin-releasing hormone**
- Current, short-circuit, flux, basolateral, ouabain-treated skin (frog), R936**
- Cytokines**
 following lipopolysaccharides, R126
 hemorrhage, resuscitation and, R663
 response to, lipocortin effects, R266
- D**
- Dehydration**
 drinking behavior, circulating angiotensin II and, R531
 heat-induced limb vasodilation in, compartmental fluid repletion effects (baboon), R1139
 salt appetite, angiotensin-converting enzyme inhibitor and, R736
- Deoxycorticosterone, ANP levels, atrial appendectomy, awake state, R1017**
- Deoxyglucose, 14 C-labeled, suprachiasmatic nucleus (hamster), R1083**
- Development: see also Growth**
 postnatal, temperature effects on norepinephrine in brown fat, R90
 sodium chloride depletion during, taste response recovery and, R786
- Diabetes**
 hyperresponsiveness before, β -cells (monkey), R612
 permeability at blood-retinal barrier, aldose reductase inhibition of, R601
- Diabetes mellitus, streptozotocin treatment, awake state, substance P and somatostatin effects, R405**
- Diazepam, delayed-type hypersensitivity, fever effects on expression of, R1**
- Diazoxide, hypotension induced by, thirst relations, R362**
- Diet: see Feeding**
- Diuresis, micturition and, renal pelvic pressure, R637**
- Dopamine**
 anorectic responses, amino acid imbalance, R627
 brain, changes during anoxia (turtle), R376
- Drinking**
 behavior
 angiotensin and salt appetite, R729
 angiotensin-converting enzyme inhibitor and, R736
 cerebral sodium concentration and, R741
 circulating angiotensin II and, R531
 light-dark cycle modulation of, homeostatic challenges, R1035
 sham, intraduodenal infusion of fat and satiety, R110
 thirst, diazoxide-induced hypotension relations, R362
- E**
- Ectotherm, temperature and pH effects, muscle, R204**
- Edema, outflow pressure effects, liver lymph flow (sheep), R780**
- Electroencephalography**
 forebrain-sympathetic nerve relations, R572
 interleukin 1β somnogenic activity, interleukin 1α , R439
- Electrolytes**
 balance, aldosterone in angiotensin hypertension, R102
 transport, jejunal, hypertonic solution effects, R1289
- Electromyography, diaphragmatic, apneas and arrhythmias, R282**
- Emotion, cardiovascular response to, neurons in control of, R943**
- Enalapril, response to ANF, heart failure, R84**
- Endolymphatic sac, direct current potential, catecholamine depression of (guinea pig), R921**
- Endotoxin**
 activation, guanylate cyclase, vascular smooth muscle, R38
 acute phase response to, α -melanocyte-stimulating hormone effects, R768
 interleukin 1 and TNF- α induction of plasma inhibitors of, R993
 interleukin 1β and TNF, fever, R724
- Endurance: see Exercise**
- Energy**
 balance
 candidate genes in regulation of (monkey), R1148
 paraventricular nucleus and, exercise, R579
 expenditure
 basal metabolic rates and (bird), R333
 nutrient intakes and, overfed young men, R461
 pregnancy, calorimetric study of (hamster), R807
 weight cycling effects on dietary obesity, R1096
 metabolism, obesity-prone and obesity-resistant rats, R1103
- Enzymes: see also specific enzyme**
 muscle, neutrophils and, acute phase response in exercise, R1214
- Epidermal growth factor, sources, plasma and serum, R545**
- Epinephrine**
 brain, changes during anoxia (turtle), R376
 depression, endolymphatic sac direct current potential (guinea pig), R921
 hypothalamic control
 exercise metabolism, R478
 sympathoadrenal activity, R470
 response, hypoglycemia, enlarged adrenal medulla and, R998
 stress and, brain lactate, R773
- Estrous cycle, cold-induced anestrus, diet and body fat effects (hamster), R1198**
- Exercise**
 acute phase response in, neutrophils and muscle enzymes, R1214
 endurance, thermal dependence (reptile, amphibian), R253
 energy balance, paraventricular nucleus and, R579
 hand, forearm ischemia and, R1156
 maximal oxygen consumption, quantitative genetics (snake), R986
 metabolism, paraventricular hypothalamic adrenoceptors and, R478
 muscular contraction, discharge patterns, ventrolateral medullary neurons, R606
 running, deactivation rate and shortening velocity in contractile frequency, R223
 stress and, hippocampus and striatum extracellular lactate, R773
 swimming, deactivation rate and shortening velocity in contractile frequency, R223
 swim training, adrenal medulla and, R998
 sympathoadrenal activity in, hypothalamic adrenoceptor mediation of, R470
- F**
- Fasting, duration, plasma ketones and, neonate (seal), R1086**
- Fat**
 body
 diet and, effects on cold-induced anestrus (hamster), R1198
 distribution, weight cycling and, R1096
 spontaneous obesity in aging males, model, R1117
 intraduodenal infusion, satiety and, R110
 preference, sham-feeding, obesity and, R1093
- Fatty acids**
 dietary, forearm vascular resistance and, R1164
 free
 exercise metabolism, R478
 maternal hypoglycemia, fetal response to catecholamines and, R1126
 synthesis, putative lipostatic factor and, R45
- Feedback, tubuloglomerular, ANF modulation of, kidney, R97**
- Feeding**
 appetite, candidate genes in regulation of (monkey), R1148
 behavior
 central injection of GRF, R651
 neuropeptide and peptide effects, fourth ventricular, R317

Feeding (*continued*)

- diet
 - capsaicin and brown fat atrophy, R324
 - cold-induced anestrus (hamster), R1198
 - monitoring of bone resorption, R679
 - salt intake, calcium deprivation effects, R411
- dietary limiting amino acid effects, prepyriform cortex, R709, R716
- eating, ventromedial hypothalamic lesions and gastric emptying, R658
- food intake depression, serotonin receptor antagonists and, R627
- food restriction, susceptibility to dietary obesity and, R1096
- glucoprivation, gastric motility and pituitary oxytocin secretion in, R447
- high-fat diet, vagal stimulation in obesity, R842
- overfeeding, nutrient intakes and energy expenditure, young men, R461
- plasma cortisol levels, preweaning life (baboon), R157
- putative lipostatic factor and, R45
- real or sham, insulin and flavor aversions, R823
- sham
 - behavioral adjustments, R1228
 - corn oil preference and obesity, R1093
 - intraduodenal infusion of fat and satiety, R110
 - short-term hormonal responses to, peripubertal female, R25
 - sodium appetite, cerebral sodium concentration and, R741
 - specific hunger, salt, angiotensin and, R729
 - ventromedial hypothalamic obesity syndrome, analysis of, R829
- Fetus: *see also* Placenta; Pregnancy
 - catecholamines, response to maternal hypoglycemia, R1126
 - endocrine responses, prolonged hypoxemia (sheep), R703
 - intramembranous pathway, filtration coefficient and (sheep), R1281
 - renal sympathetic nerves, volume expansion effects (sheep), R1050
- Fever
 - brain, vasopressin and oxytocin responses, R1056
 - inhibition, delayed-type hypersensitivity, R1
 - interleukin 1 and TNF- α inhibitors, induction of, R993
 - lipocortin effects, response to cytokines, R266
 - lipopolysaccharide, interleukin 1 β and TNF role in, R724
- Filtration
 - glomerular
 - ANF effects on tubuloglomerular feedback, R97
 - response to graded hemorrhage, awake state (pig), R119
- Fluid
 - allantoic, endocrine and fluid-balance responses to loss (sheep), R745
 - amniotic
 - endocrine and fluid-balance responses to loss (sheep), R745
 - filtration coefficient, fetus (sheep), R1281
 - balance, aldosterone in angiotensin hypertension, R102

- excretion, after cardiac denervation, R70
- transcapillary, angiotensin II hypertension and, R1205
- Food intake: *see* Feeding
- Forebrain, rhythm, sympathetic nerve relations, R572

G

- Ganglion, transmission, ACh, presynaptic regulation of, R288
- Gas, exchange, metabolic rate and bicarbonate kinetics, R163
- Gastric acid
 - output, basal and pentagastrin stimulated (horse), R1259
 - secretion, basal and pentagastrin stimulated (horse), R1259
- Gastric emptying
 - measurements of, R1090
 - real or sham feeding, insulin and flavor aversions, R823
 - ventromedial hypothalamic lesions and, R658
- Gene, expression, temperature acclimation and (fish), R237
- Genetics, quantitative, maximal oxygen consumption (snake), R986
- Glucocorticoids, lipocortin effects, response to cytokines, R266
- Gluconeogenesis, adaptation to acidosis, renal, R277
- Glucoprivation, gastric motility, pituitary oxytocin secretion and, R447
- Glucose
 - sodium-coupled transport, urinary bladder (crustacean), R147
 - tolerance, β -cells, before non-insulin-dependent diabetes (monkey), R612
 - uptake, cold effects, peripheral tissues, R1043
- Glutamate
 - brain, changes during anoxia (turtle), R376
 - pressor response, stimulation of nucleus ambiguus, R955
- L-Glutamate, microinjection, intermedialateral nucleus, R357
- Glutarate, sodium-coupled transport, urinary bladder (crustacean), R147
- GRF: *see* Growth hormone-releasing factor
- Growth: *see also* Development
 - regulation, vascular system, R393
- Growth hormone-releasing factor, central injection of, feeding behavior and, R651
- Guanethidine, sympathectomy, neuropeptide Y and noradrenergic mechanisms in, R371
- Guanosine monophosphate, cyclic activation, interleukin 1 and endotoxin effects, vascular smooth muscle, R38
- capsaicin desensitization, atrophy in brown fat and, R324
- Guanylate cyclase, activation, interleukin 1 and endotoxin effects, vascular smooth muscle, R38
- Gustatory response
 - nerve, monosodium glutamate and 5'-nucleotides synergism, R420
 - recovery, after early sodium chloride deprivation, R786
 - salt intake, calcium deprivation and, R411
 - threshold, circadian rhythm in, R931

H

- Halothane, sensitivity (pig), R133
- Heart
 - arrhythmia, sleep apnea and, R282
 - denervation, fluid load after, R70
 - failure, renal response to ANF, R84
 - function, anoxia and acidosis, ^{31}P -NMR measurements, heart (turtle), R521
 - response to hypoxia (seal, pig), R849
 - sympathetic nerve, synchronized activity, awake state, R499
 - tissue, anoxia and acidosis effects (turtle), R15
- Heart atria, appendectomy, ANP plasma levels and, awake state, R1017
- Heart failure, congestive, ANF effects on tubuloglomerular feedback, R97
- Heart rate
 - anoxia and acidosis effects (turtle), R15
 - baroreflex control of, parasympathetic impairment of, R76
 - fetus, uterine blood flow effects, R1004
 - pressor response, stimulation of nucleus ambiguus, R955
 - schedule-induced activities, R485
 - streptozotocin treatment, awake state, substance P and somatostatin effects, R405
- Heat, production, skeletal muscle contraction and, R197
- Heat stress, vasodilation induced by, limb, compartmental fluid repletion effects (baboon), R1139
- Hemoglobin, maximal oxygen consumption, quantitative genetics (snake), R986
- Hemorrhage
 - graded, renal response to, awake state (pig), R119
 - metabolic and hormonal activations during, brain, R305
 - organ function after, preheparinization and, R645
 - resuscitation and, R663
 - thermal nociception, ACTH and norepinephrine release by blood loss, R1236
- Heparin, preheparinization, organ function after hemorrhage and, R645
- Hepatic nerve, electrolyte transport, hypertonic solution effects, R1289
- Hepatocellular function, after hemorrhage and resuscitation, preheparinization effects, R645
- Hibernation
 - changes, mucosal structure of intestine (squirrel), R385
 - testosterone and (squirrel), R760
- Hippocampus, striatum extracellular lactate and, exercise and stress effects, R773
- Histamine, pressor response to peripheral hyperosmolality and, brain, R507
- Hormonal response, short-term, food intake, peripubertal female, R25
- Hunger: *see* Feeding
- Hydralazine, serotonergic neuron response to, R963
- Hypercapnia
 - temperature effects, awake state, R492
 - vasopressin role during, awake state, R690
- Hyperinsulinemia, vagal stimulation, diminished cardiovascular responsiveness to, R842

Hyperosmolality
 arginine vasopressin effects, CSF composition, R1250
 pressor response to, histamine regulation of, brain, R507
Hypersensitivity, delayed-type, expression, fever effects, R1
Hypertension
 angiotensin II
 aldosterone role in, R102
 chronic lymph flow and transcapillary fluid flux during, R1205
 salt sensitivity in, R1012
 arterial pressure, after barodenervation, R1172
 development of, central mineralocorticoid binding sites in, R1025
 DOCA-salt, central mineralocorticoid binding sites in, R1025
 obesity-induced, baroreflex sensitivity in, model, R981
 salt-sensitive, parasympathetic impairment of baroreflexes, heart, R76
 vagal stimulation, diminished cardiovascular responsiveness to, R842
Hyperthermia
 brown fat, atrophic state of, R61
 malignant, halothane sensitivity (pig), R133
Hypertonic solution, electrolyte transport and, jejunum, R1289
Hypoglycemia
 diminished epinephrine response to, enlarged adrenal medulla and, R998
 gastric motility, pituitary oxytocin secretion and, R447
 maternal, fetal response to catecholamines, R1126
Hypotension
 diazoxide-induced, thirst relations, R362
 drinking behavior, circulating angiotensin II and, R531
 renin activity, progesterone-cortisol interaction in, R350
Hypothalamus
 anterior, injection of CRH, sympathetic activity and, R799
 control, sympathoadrenal activity, R470
 energy metabolism, exercise and, R478
 lateral, perifornical region, neurons controlling cardiovascular response to emotion, R943
 RU 496 effects, development of obesity, R539
 ventromedial
 lesions, gastric emptying and, R658
 obesity syndrome, R829
Hypoxemia
 prolonged, fetal endocrine responses to (sheep), R703
 vasopressin role during, awake state, R690
Hypoxia
 control of breathing after, neonate, R836
 progressive and acute, heart responses (seal, pig), R849
 temperature effects, awake state, R492

I

Insulin
 flavor aversions and preferences with, real or sham feeding, R823
 reduced adiponin mRNA and, obesity, R184
 response, β -cells, before non-insulin-dependent diabetes (monkey), R612

sensitivity, obesity-prone and obesity-resistant rats, R1103
Interleukin 1
 activation, guanylate cyclase, vascular smooth muscle, R38
 plasma inhibitor of, endotoxin effects, R993
Interleukin 6, plasma profile of, fever-inducing doses of lipopolysaccharide and, R126
Interleukin 1 α , interleukin 1 β fragment, somnogenic activity, R439
Interleukin 1 β , TNF and, lipopolysaccharide fever, R724
Intermediolateral nucleus, microinjection of AcH and substance P, cardiovascular response and, R357
Intestine
 brush-border membrane vesicles, lysine transport (eel), R1181
 mucosal structure and function, seasonal changes (squirrel), R385
 plasma membrane, PCMBs inhibition of chloride transport (seahare), R1111
 Ipsapirone, stress and, brain lactate, R773
 Ischemia, forearm, cardiovascular and sensory responses, hand exercise, R1156
 Isoleucine, food intake and, prepyriform cortex, R709, R716
 Isoproterenol, depression, endolymphatic sac direct current potential (guinea pig), R921

J

Jejunum
 electrolyte transport, hypertonic solution effects, R1289
 mucosal structure and function, seasonal changes (squirrel), R385

K

Ketones, plasma, fasting duration relations, neonate (seal), R1086
Kidney
 circulatory action of ANP, sympathectomy effects, R1275
 clearance, after cardiac denervation, R70
 function
 ANF and blood pressure control, R973
 arterial pressure after barodenervation, R1172
 fetal, uterine blood flow effects, R1004
 graded hemorrhage effects, awake state (pig), R119
 hemodynamics, intrarenal renin inhibition effects, R7
 metabolic characteristics, adaptation to acidosis, R277
 response to adrenergic stimulation, anterior third ventricle (duck), R294
 sensitivity, subnormal levels of AVP and, R53
 sodium and water excretion, centrally administered serotonin and, R1267
 tubuloglomerular feedback, ANF modulation of, R97
Kidney pelvis, pressure, regulation by diuresis and micturition, R637

L

Lactate
 cell, cardiac tissue, anoxia effects (turtle), R15

striatum extracellular, exercise and stress effects, R773
Lactic acid, release, myocardial, hypoxia (seal, pig), R849
Leucine, sodium-coupled transport, urinary bladder (crustacean), R147
Lipids
 corn oil preference, sham-feeding, obesity and, R1093
 intraduodenal infusion, satiety and, R110
Lipocortin, response to cytokines and, R266
Lipopolysaccharide, fever-inducing doses of, plasma profiles of interleukin 6 and TNF, R126
Lipostatic factor, putative, site of action, R45
Liver
 lymph flow, outflow pressure effects (sheep), R780
 synthesis, female protein (Armenian hamster), R341
Locomotion, muscle performance and, temperature change effects, R189
Locomotor capacity, thermal dependence of (reptile, amphibian), R253
Lung, liquid, endocrine and fluid-balance responses to loss (sheep), R745
Luteinizing hormones, response, feeding, peripubertal feeding, R25
Lymph flow
 chronic, angiotensin II hypertension and, R1205
 liver, outflow pressure effects (sheep), R780
Lymphocytes, hemorrhage, resuscitation and, R663
Lysine, transport, brush-border membrane vesicles, intestine (eel), R1181

M

Macrophages, hemorrhage, resuscitation and, R663
Macula densa, long-term arterial pressure control, computer and graphic models, R865
Mechanoenergetics, simulation, asynchronously contracting ventricle, R1075
Median preoptic nucleus, osmosensitive units in (sheep), R593
Medulla oblongata, interstitial solute dispersion, microvascular specializations, R1131
 α -Melanocyte-stimulating hormone, endotoxin and, R768
Membrane, opercular, cortisol stimulation of chloride cells (tilapia), R857
Mesenteric veins, norepinephrine sensitivity, pregnancy, R753
Metabolic rate
 basal, body composition and energy expenditure (bird), R333
 bicarbonate washout kinetics and, R163
 resting, temperature regulation in air and water (coyote), R1220
Metergoline, anorectic responses, amino acid imbalance, R627
Microcirculation: see also Blood flow; Circulation
 lymph flow, hypertension and, R1205
Micturition, diuresis and, renal pelvic pressure, R637
Mineralocorticoids, binding sites, development of hypertension and, R1025

Models

- calcium uptake, vascular smooth muscle, R172
- computer and graphic, long-term arterial pressure control, R865
- mammillary, metabolic rate and bicarbonate kinetics, R163
- mechanoeconomics, asynchronously contracting ventricle, R1075
- obesity-induced hypertension, baroreflex sensitivity in, R981
- spontaneous obesity, aging males, R1117
- Monosodium glutamate, 5'-nucleotides and, synergism, taste nerve responses, R420
- Motility, gastric, glucoprivation effects, R447
- α -MSH: see α -Melanocyte-stimulating hormone

Muscle

- contractile frequency, deactivation rate and, R223
- contractile properties, thermal acclimation and (fish), R231
- contraction
 - discharge patterns, ventrolateral medullary neurons, R606
 - temperature change effects, R197
- enzymes, neutrophils and, acute phase response in exercise, R1214
- function, temperature effects, R259
- performance, temperature changes and, R189
- pH, temperature and, R204
- recruitment, temperature change effects, R210
- temperature acclimation, metabolic response to (fish), R245
- Muscle, skeletal
 - contractile properties, thermal acclimation and (fish), R231
 - contraction
 - halothane sensitivity (pig), R133
 - temperature change effects, R197
 - glucose uptake, cold effects, R1043
- Muscle, smooth
 - vascular
 - calcium uptake, compartmental analysis, R172
 - guanylate cyclase, activation by interleukin 1 and endotoxin, R38
- Muscle fiber, type, temperature effects, R210
- Myocardium, sarcolemma, calcium transport (trout), R453

N

Natriuresis

- pressure
 - arterial pressure after barodenervation, R1172
 - hypertension with angiotensin II, R1012
- serotonin effects, kidney, R1267

Neonate

- core temperature, circadian cycle of, R270
- fasting duration, plasma ketone relations (seal), R1086
- hypoxia, control of breathing after, R836
- preweaning life, feeding effects on preweaning (baboon), R157

- Neural control, respiration, receptor interactions in, R911

- Neuroendocrinology, median preoptic nucleus, osmoreponsive units in (sheep), R593

- Neurogenesis, respiratory rhythm and pattern, R879

- Neurohypophysis, median preoptic nucleus, osmoreponsive units in (sheep), R593

- Neuroimmunomodulation, delayed-type hypersensitivity, fever effects on expression of, R1

Neurons

- brain stem, sympathetic nerve relations, R561
- lateral hypothalamus-perifornical region, control of cardiovascular responses to emotion, R943
- serotonergic, response to vasoactive drugs, R963
- ventrolateral medullary, discharge patterns during muscular contraction, R606

Neuropeptides

- during fever, brain, R1056
- microinjection of, ventrolateral medulla, cardiovascular effects, R32

Neuropeptide Y

- fourth ventricular, ingestive and other behavior and, R317
- mechanisms, guanethidine-sympathectomy, R371
- release, calcium channel and protein kinase C role in (guinea pig), R925

Neurotransmitters

- brain, changes during anoxia (turtle), R376
- response to prostaglandin fever, brain, R1056

- Neutrophils, muscle enzymes and, acute phase response in exercise, R1214

- Nitric oxide, activation, guanylate cyclase, vascular smooth muscle, R38

- Nitroprusside, renin activity, progesterone-cortisol interaction in, R350

Norepinephrine

- ANP levels, atrial appendectomy, awake state, R1017

- brain, changes during anoxia (turtle), R376

- central, third ventricle perfusion with (duck), R294

- depression, endolymphatic sac direct current potential (guinea pig), R921

- fatty acids, baroreflexes and, forearm, R1164

- fetal, response to maternal hypoglycemia, R1126

- hypothalamic control

- exercise metabolism, R478

- sympathoadrenal activity, R470

- release

- calcium channel and protein kinase C role in (guinea pig), R925

- thermal nociception and, blood loss, R1236

- response, hypoglycemia, enlarged adrenal medulla and, R998

- sensitivity, mesenteric veins, pregnancy, R753

- turnover, brown fat, temperature effects, R90

- Nuclear magnetic resonance, phosphorus-31, anoxia and acidosis, heart (turtle), R521

- 5'-Nucleotides, monosodium glutamate and, synergism, taste nerve responses, R420

- Nucleus ambiguus, stimulation, pressor response mechanism, R955

- Nucleus tractus solitarius, interstitial solute dispersion, microvascular specializations, R1131

Nutrients

- absorption, brush-border membrane vesicles, intestine (eel), R1181
- intake, energy expenditure and, overfed young men, R461

O

Obesity

- adipsin, adrenal steroid effects, R184
- brown fat, atrophic state of, R61
- β -cell hyperresponsiveness, before non-insulin-dependent diabetes (monkey), R612
- corn oil preference and, R1093
- development of, RU 486 effects, R539
- dietary, susceptibility to, weight cycling and, R1096
- hypertension induced by, baroreflex sensitivity in, model, R981
- nutrient intakes, energy expenditure and, young men, R461
- resistance, metabolic differences, R1103
- spontaneous, aging males, model, R1117
- vagal stimulation, diminished cardiovascular responsiveness to, R842
- ventromedial hypothalamic syndrome dissociative analysis, R829
- gastric emptying and, R658
- Oligohydramnios, endocrine and fluid balance responses, amniotic and allantoic fluid loss (sheep), R745
- Oscillators, coupled, sympathetic nerve activity, R549
- Osmoregulation
 - drinking behavior, circulating angiotensin II and, R531
 - median preoptic nucleus (sheep), R593
- Ouabain, skin treated with, net basolateral potassium flux and short-circuit current in (frog), R936
- Overhydration, antidiuretic effects, subnormal AVP, R53

Oxygen

- body temperature effects, awake state, R492
- consumption
 - asynchronously contracting ventricle, R1075
 - maximal, quantitative genetics of (snake), R986
 - myocardial, hypoxia (seal, pig), R849
 - pregnancy, calorimetric study (hamster), R807
 - schedule-induced activities, R485
 - respiratory rhythms, chemoreceptor modulation of, R887
- Oxytocin
 - pituitary secretion, glucoprivation effects, R447
 - vasopressin and, during fever, brain, R1056

P

- Pacemaker cells, neurogenesis, respiratory rhythm and pattern, R879

- Pancreatic cells, β -, hyperresponsiveness before diabetes (monkey), R612

- Parasympathetic nervous system, impairment of baroreflex control, heart rate, R76
- Parathyroid hormone, bone resorption, continual monitoring of, R679
- Paraventricular nucleus
adrenoceptors, exercise metabolism and, R478
energy balance and, exercise, R579
glucoprivation, gastric motility and pituitary oxytocin secretion in, R447
injection of GRF, feeding behavior and, R651
neurons, cardiovascular response to emotion, R943
pressor responses, histamine regulation, R507
- PCMBs: *see* *p*-Chloromercurobenzene sulfate
- Pentagastrin, stimulation, gastric secretion (horse), R1259
- Peptides: *see also* Polypeptides
modulation, endotoxin and α -MSH, R768
- Peptide YY, fourth ventricular, ingestive and other behavior and, R317
- Permeability
amniotic fluid, filtration coefficient, fetus (sheep), R1281
blood-retinal barrier, aldose-reductase inhibition, diabetes, R601
capillary, interstitial convection, nucleus tractus solitarius, R1131
- pH
cell, cardiac tissue, anoxia effects (turtle), R15
gastric secretion, basal and pentagastrin stimulated (horse), R1259
intracellular, anoxia and acidosis, 31 P-NMR measurements, heart (turtle), R521
muscle, temperature and, R204
- Phase-response curve, circadian rhythms, entrainment of, bright light and sleep-wake schedules, R1189
- Phenoxybenzamine, pressor response, stimulation of nucleus ambiguus, R955
- Phentolamine, anorectic responses, amino acid imbalance, R627
- Phenylalkylamines, neuropeptide Y release and (guinea pig), R925
- Phenylephrine, mechanisms, guanethidine-sympathectomy, R371
- Phenylephrine hydrochloride, serotonergic neuron response to, R963
- Phosphates, inorganic, anoxia and acidosis, 31 P-NMR measurements, heart (turtle), R521
- Pimozide, anorectic responses, amino acid imbalance, R627
- Pirenpirone, anorectic responses, amino acid imbalance, R627
- Pituitary hormones, response, feeding, peripubertal feeding, R25
- Placenta: *see also* Fetus; Pregnancy
filtration coefficient, determination of (Sheep), R1281
- Platelets, epidermal growth factor, sources for, R545
- Polydipsia, schedule-induced, physiological correlates of, R485
- Polypeptides: *see also* Peptides
pancreatic, ingestive and other behavior with, R317
- Potassium, flux, basolateral, ouabain-treated skin (frog), R936
- Potentials, direct current, endolymphatic sac, catecholamine depression of (guinea pig), R921
- Pregnancy: *see also* Fetus; Placenta
energetics of, calorimetric study (hamster), R807
hypoglycemia in, fetal response to catecholamines and, R1126
norepinephrine sensitivity, mesenteric veins, R753
renin activity, progesterone-cortisol interaction in, R350
- Prepyriform cortex
dietary limiting amino acid injection into food intake and, R709
meal patterns and, R716
- Pressor response, mechanism, stimulation of nucleus ambiguus, R955
- Pressure: *see also* Blood pressure
arterial
central control of, R1063
diazoxide-induced hypotension relations, R362
intrarenal ANP infusion and, R585
long-term control, models, R865
normalization of, after barodenervation, R1172
stimulation of nucleus ambiguus, R955
lower body negative, baroreflex response to, R792
outflow, liver lymph flow and (sheep), R780
venous, baroreflex response to, R792
- Progesterone, cortisol interaction, control of renin activity, R350
- Prostaglandins, during fever, brain, R1056
- Prostaglandin E_2 , prolonged hypoxemia and (sheep), R703
- Protein
adipin, reduced, adrenal steroids and, obesity, R184
female (Armenian hamster), R341
myofibrillar, thermal acclimation and (fish), R231
- Protein kinase C, calcium channels and, release of norepinephrine and neuropeptide Y (guinea pig), R925
- Puberty, peripubertal female, hormonal responses to feeding, R25
- Pyrogen, interleukin 1β and TNF, fever, R724
- R**
- Receptors
adrenoceptors
hypothalamic, sympathoadrenal activity and, exercise, R470
paraventricular hypothalamic, exercise metabolism and, R478
baroreceptors, denervation effects, vasopressin and drinking, R618
chemoreceptors
endogenous respiratory rhythm and, R887
modulation of ventilatory activity, R911
dihydropyridine, myocardial sarcolemma (trout), R453
glucocorticoid GR, development of obesity and, R539
low-pressure, hemorrhage, brain, R305
- mechanoreceptors
endogenous respiratory rhythm and, R898
modulation of ventilatory activity, R911
muscarinic and nicotinic, modulation of ACh release, ganglionic, R288
respiratory control and, vertebrates, R878
- Reflexes
baroreflexes
control, forearm vascular resistance, dietary fatty acids and, R1164
parasympathetic impairment of heart rate control, R76
response to blood volume changes, R792
response to vagal stimulation, R842
sensitivity, obesity-induced hypertension, model, R981
- Hering-Breuer
interbreath interval (African lungfish), R139
respiratory control after hypoxia, neonate, R836
- pressor, discharge patterns, ventrolateral medullary neurons, R606
- Renal nerves, serotonin-induced natriuresis and, R1267
- Renin
activity, progesterone-cortisol interaction in control of, R350
intrarenal inhibition, kidney hemodynamics and excretory function, R7
long-term arterial pressure control, computer and graphic models, R865
vasopressin and drinking, baroreceptor effects, R618
- Renin-angiotensin system
ANF and, blood pressure control, R973
enalapril and response to ANF, heart failure, R84
fluid excretion and, after cardiac denervation, R70
hypertension, salt sensitivity and, R1012
hypotension, thirst relations, R362
inhibition, salt appetite and, R736
intrarenal inhibition, kidney hemodynamics and excretory function, R7
- Resistance
peripheral, ANP infusion and vasoconstriction, awake state, R813
vascular, forearm, dietary fatty acids and, R1164
- Respiration
body temperature effects, awake state, R492
movements, fetal, endocrine responses to hypoxemia (sheep), R703
rhythm and pattern, neurogenesis of, R879
- Respiratory drive, apneas and arrhythmias, free movement and, R282
- Respiratory pattern
chemoreceptor modulation of, R887
mechanoreceptor modulation of, R898
- Respiratory regulation
after hypoxia, neonate, R836
chemoreceptor modulation, R887
mechanoreceptor modulation of, R898
timing
interbreath interval (African lungfish), R139
receptors in, vertebrates, R878
- Resuscitation, hemorrhage and, R663
preheparinization and, R645

Retinopathy, diabetes, aldose reductase inhibition of, R601

Rhythms

cardiac-related, sympathetic nerve activity, awake state, R499

circadian

core temperature, juvenile rat, R270
entrainment of, bright light and sleep-wake schedules, R1189
modulation of homeostatic drinking, R1035
suprachiasmatic nucleus (hamster), R1083
taste threshold and, R931
triazolam effects (hamster), R514
diurnal, bone resorption, R679

respiratory

central generation, R1063
chemoreceptor modulation of, R887
mechanoreceptor modulation of, R898
neurogenesis of, R879

Ribonucleic acid, temperature acclimation and (fish), R237

Rostral ventrolateral medulla, sympatho-respiratory integration and, R1063

RU 486, development of obesity and, R539

Running: *see* Exercise

S

Salt

appetite

angiotensin and, R729
angiotensin-converting enzyme inhibitor and, R736
intake, calcium deprivation and, R411
sensitivity, hypertension with angiotensin II, R1012
taste, recognition threshold of, circadian rhythm in, R931

Sarcolemma, myocardial, calcium transport (trout), R453

Satiety

behavioral adjustments, sham feeding, R1228
intraduodenal infusion of fat and, sham-fed rats, R110
real or sham feeding, insulin and flavor aversions, R823

Sensory nerves, capsaicin desensitization, atrophy in brown fat and, R324

Serotonin

brain, changes during anoxia (turtle), R376
centrally administered, renal sodium and water excretion and, R1267
receptor antagonists, anorectic response to amino acid imbalance and, R627

Shunt, peripheral pentose, putative lipostatic factor and, R45

Skin, ouabain-treated, net basolateral potassium flux and short-circuit current in (frog), R936

Sleep, interleukin 1 β somnogenic activity, interleukin 1 α , R439

Sodium

absorption, portal hypertonic sodium chloride infusion, R1289
ANF and, blood pressure control, R973
cerebral concentration, appetite and, R741
concentration, salivary, circadian rhythm in, R931
depletion, renal hemodynamics and excretory function with, R7

excretion

ANP infusion and arterial pressure, R585
response to graded hemorrhage, awake state (pig), R119
serotonin effects, kidney, R1267
intake, calcium deprivation and, R411
loss, urinary, replacement of, awake state, R313
organic anion transport, urinary bladder (crustacean), R147
reabsorption, heart failure, R84
retention
hypertension, angiotensin II and, R1012
tubuloglomerular feedback, R97
transport, basolateral, ouabain-treated skin (frog), R936

Sodium-calcium exchange, myocardial sarcolemma (trout), R453

Sodium chloride

appetite

angiotensin and, R729
angiotensin-converting enzyme inhibitor and, R736
depletion, during development, taste response recovery after, R786
portal hypertonic infusion, sodium absorption during, R1289
response, glutamate and nucleotides, R420

Sodium nitroprusside

ANP effects, renal, R1275
serotonergic neuron response to, R963
Sodium-potassium-ATPase, cortisol effects, opercular membrane (tilapia), R758

Solutes, interstitial dispersion, nucleus tractus solitarius, R1131

Somatostatin, central effects, streptozotocin-treated, awake state, R405

Sorbitol, permeability at blood-retinal barrier, diabetes, R601

Spectral analysis, sympathetic nerve pairs, activity relations, R549

Starvation: *see* Fasting

Steroids, sex, synthesis (Armenian hamster), R341

Stomach, ventromedial hypothalamic lesions, gastric emptying and, R658

Stress

exercise and, hippocampus and striatum extracellular lactate, R773
renin activity, progesterone-cortisol interaction in, R350

Substance P

central effects, streptozotocin-treated, awake state, R405
microinjection, intermedialateral nucleus, R357

Substrates, metabolic, adaptation to acidosis and, kidney, R277

Sulfhydryl ligands, inhibition, active chloride transport, plasma membrane vesicles, gut (seahare), R1111

Superoxide, muscle enzymes and, acute phase response in exercise, R1214

Suprachiasmatic nucleus, metabolic activities of (hamster), R1083

Supraoptic nucleus, sinoaortic denervation, cerebral, baroreceptors and metabolism, R305

Swimming: *see* Exercise

Sympathectomy

ANP circulatory action and, renal, R1274

chemical, noradrenergic and neuropeptide Y mechanisms in, R371

Sympathetic activity

rostral ventrolateral medulla, R1063
stimulation of, corticotropin-releasing hormone and, R799
vasoactive drugs, serotonergic neuron response to, R963

Sympathetic nerve

activity, forebrain rhythm generators and, R572
cardiac, synchronized activity, awake state, R499
discharge, medullary unit activity and, R561

pairs, activity relations, R549
renal, fetus, volume expansion effects (sheep), R1050

Sympathetic nervous system

capsaicin desensitization, atrophy in brown fat and, R324
central mineralocorticoid binding sites, hypertension, R1025
temperature, norepinephrine turnover in brown fat, R90

Sympathoadrenal activity, exercise, hypothalamic adrenoceptors in, R470

T

Taste: *see* Gustatory response

Taurine, brain, changes during anoxia (turtle), R376

Temperature

acclimation

mechanisms of (fish), R237
metabolic response to, muscle (fish), R245
muscle contractile properties (fish), R231

changes

locomotor capacity (reptile, amphibian), R253
muscle function and, R259
lipopolysaccharide-induced fever, cytokines and, R126
norepinephrine turnover and, brown fat, R90
regulation, air and water (coyupus), R1220

Temperature, body

changes

muscle and locomotor performance with, R189
muscle contraction and, R197
muscle recruitment and function, R210
nervous system and, R191
circadian rhythms, entrainment of, bright light and sleep-wake schedules, R1189
core, circadian cycle of, juvenile rat, R270
deactivation rate and shortening velocity, contractile frequency and, R223
hibernation, testosterone and (squirrel), R760
hypoxic and hypercapnic responses and, awake state, R492
interleukin 1 β somnogenic activity, interleukin 1 α , R439
pH and, muscle, R204
Testosterone, hibernation and (squirrel), R760
Tetracycline, bone resorption and, R679

Thermal dependence
 locomotor capacity (reptile, amphibian), R253
 muscle function, R197
 Thermogenesis
 capsaicin desensitization, atrophy in brown fat and, R324
 lipocortin effects, response to cytokines, R266
 nonshivering
 atrophic state of brown fat, R61
 glucose uptake, peripheral tissues, R1043
 norepinephrine turnover and, brown fat, R90
 Thermoregulation, core temperature, circadian cycle of, juvenile rat, R270
 Thirst: *see* Drinking
 Threonine, food intake and, prepyriform cortex, F709, R716
 Thrombocytopenia, epidermal growth factor, serum and plasma sources for, R545
 Thyroxine 5'-deiodinase, capsaicin desensitization, atrophy in brown fat and, R324
 TNF: *see* Tumor necrosis factor
 Triazolam, injection, circadian period changes and (hamster), R514
d-Tubocurarine, ganglionic, modulation of release by muscarinic and nicotinic receptors, R288
 Tumor necrosis factor
 interleukin 1 β and, lipopolysaccharide fever, R724
 plasma profile of, fever-inducing doses of lipopolysaccharide and, R126
 Tumor necrosis factor- α , plasma inhibitor of, endotoxin effects, R993
 Tyramine, mechanisms, guanethidine-sympathectomy, R371

U

Umami substances, taste nerve responses, R420
 Urinary bladder
 micturition, diuresis and, R637

organic anion transport, sodium-coupled (crustacean), R147
 Urine
 osmolality, vasopressin and, awake state, R690
 tetracycline in, measurement of bone resorption, R679
 Urodynamics, diuresis and micturition, regulation of renal pelvic pressure, R637
 Urogastrone, sources, serum and plasma, R545
 Uterus, blood flow: *see* Blood flow

V

Vagal afferents, mechanoreceptor modulation, endogenous respiratory rhythm, R898
 Vagus nerve
 control, interbreath interval (African lungfish), R139
 stimulation, diminished cardiovascular responsiveness to, R842
 Vascular system, growth regulation, R393
 Vasoactive drugs, serotonergic neuron response to, R963
 Vasoconstriction
 after autonomic blockade, ANP infusion and, awake state, R813
 renal, vasopressin and, awake state, R690
 Vasodilation, limb, heat-induced, dehydration (baboon), R1139
 Vasopressin
 arginine
 CSF composition and, hyperosmolar state, R1250
 endocrine and fluid-balance responses to fluid loss (sheep), R745
 fluid excretion after cardiac denervation, R70
 prolonged hypoxemia and (sheep), R703
 subnormal levels, antidiuretic effects of, R53
 binding sites, development of hypertension and, R1025

blood volume, baroreflex response to, R792
 during hemorrhage, sinoaortic denervation and, R305
 hypoxemia and hypercapnic acidosis, renal vascular changes, awake state, R690
 osmoregulation, median preoptic nucleus (sheep), R593
 oxytocin and, during fever, brain, R1056
 vasopressin and, baroreceptor effect, R618
 Ventilatory control
 interbreath interval (African lungfish), R139
 receptor interactions in modulation of, R911
 Ventrolateral medulla, microinjection of ANF, cardiovascular effects of, R32
 Volume
 expansion
 ANP levels after atrial appendectomy, R1017
 renal sympathetic nerves in response to, fetus (sheep), R1050
 fluid, extracellular, hypertension with angiotensin II, R1012

W

Water
 excretion, serotonin effects, kidney, R1267
 intake, cerebral sodium concentration and, R741
 intake behavior, neuropeptide and peptide effects, fourth ventricular, R317
 temperature, regulation (coypos), R1220
 Weight
 body
 candidate genes in regulation of (monkey), R1148
 spontaneous obesity in aging males, model, R1117
 ventromedial hypothalamic obesity syndrome, R829
 cycling, susceptibility to dietary obesity, R1096
